

What's New in CALCMENU 2006 v7.2

CALCMENU 2006 is continuously being developed to provide enhancements to existing functions and EGS added new features for better recipe management.

Enhancements and Modifications in v7.2 Database Version: 39002

Database Access for Non-Admin Windows Users

- Two new buttons were added in the **EGS Admin** dialog box. These are the **Grant Database Access** and **Remove Database Access** buttons. These allow the SQL Server Administrator to grant or remove access rights to non-Admin Windows users of **CALCMENU**.

Merchandise, Recipe, and Menu

- Updated the Search Ingredient Forms to filter by ingredient types (**Merchandise, Recipe, Text, and Menu**).

Merchandise

- **Importation of Merchandise from Pistor.** **CALCMENU** and **F&B Control** users can import product lists from Pistor, a Swiss company which distributes a wide selection of food products. You must be a client of Pistor to enable to import merchandise from their Web site.

Recipe

- **Recipe Info 1 and 2.** **EGS** added two tabs, the **Info 1** and **Info 2** tabs in the **Create/Modify a Recipe** dialog boxes. The **Info 1** tab allows users to type the **Preparation**, and **Cooking tip/Advise** for a particular recipe. Meantime, you can type a recipe's **Refinement, Storage, and Yield/Productivity** in **Info 2** tab.

Menu

- The **Remark** and **Description** of the recipe are automatically copied when adding items to a menu.

Configuration

- **Full Text Search.** This option is added in the **Default** tab. When enabled, it allows users to search similar texts in the Merchandise, Recipe, and Menu Lists. It searches the recipe name, ingredient, and even procedure. This feature requires SQL Server 2005 and a special product key.

Translation

- **Dutch Language.** **EGS** added **Dutch** in the list of available languages in **CALCMENU 2006**. Now you can also translate information in Dutch. This feature is added to cater to Dutch-speaking clients.

What's New in F&B Control v7.2

F&B Control is continuously being developed to provide enhancements to existing functions and EGS added new features for better inventory operations and transaction management.

Enhancements and Modifications in v7.2

Database Version: 39002

Product List, Inventory, Input/Output, and (Stock) History

- In the **Chart** area under **Options** tab, **Show 100% discount** check box is added as an option. When selected, it will display or use entries with 100% discount in the **Price Evolution** form for products.
